

Dmytro Svyryd

Junior Frontend Developer

👤 Profile

I am a Frontend developer with more than 1 year of development experience. I have experience with different Frontend development technologies such as HTML, CSS, JavaScript, React, Redux, Ant Design, Bootstrap and have completed more than 10 pet-projects. I am a quick learner and able to quickly adapt to new projects and technologies.

📁 Employment History

Passing practice at Administrative services center, Klevan

May, 2022 — July, 2022

I performed the duties of a Frontend developer such as:

- Developed a website for Administrative services center by using HTML, CSS, JavaScript and Bootstrap.
- Transferred the website to the content management system WordPress.
- Using WordPress, added some Backend functionality (electronic queue and Newslines)

Internship at RenomeSmart, Rivne

December, 2021 — June, 2022

RenomeLab is a student program of RenomeSmart. The purpose of the program is to create social projects to improve the city. I was a member of the Lab_1 team and performed the role of a software engineer:

- Designed parking system.
- Created a layout of a parking application in Figma.
- Tested user interface.
- Presented the project to local authorities.
